MIXING THE RIGHT SOLUTION!

Use this chart as a guideline for diluting the products sold in this catalog. 1:x means 1 part concentrate to x parts water. For example, to make a quart of solution in a 1:15 dilution, mix 2-oz. of concentrate into 30-oz. of water. **NOTE: To minimize foaming, fill the container with water before adding the concentrate. Then stir thoroughly.**

E Scratch-Free Scrubbing Sponge Safely use scrubbing sponge to scrub without the fear of scratching your favorite surfaces. Unlike traditional sponges, Scrub Daddy® has been independently lab tested to rinse clean of debris and resist odors for up to two months. Scrub Daddy® is made from exclusive scratch-free FlexTexture™ that transforms consistency by simply adjusting your water temperature. In warm water, it becomes soft and compressible; in cold water it becomes firm to give even more scrubbing power.

CHEMICALS

Pine-Sol

A Multi-Surface Cleaner Disinfectant EPA-registered disinfectant that kills germs and bacteria. Its distinctive scent deodorizes and eliminates odor-causing bacteria while its deep-down cleaning power penetrates and breaks down the toughest soils. Removes grease and grime quickly without leaving a sticky residue, leaving behind a pleasant, long lasting fresh, clean scent of pine. Can be used on a wide variety of tough jobs and surfaces including floors, counters and sinks. The combination of a low pH, pine essential oil and powerful surfactants makes this cleaner a great choice for cleaning and removing grease from quarry tile in commercial kitchens.

MISTY.

D Painless Stainless Steel Cleaner Stainless steel cleaner is a creamy foam, water-based formula used for cleaning and polishing stainless steel, chrome, Formica®, copper, aluminum, brass and other hard surfaces. The water-in-oil emulsion, where the oil surrounds the water and contacts the surface to be cleaned first, allows the product to act like a solvent (oil-based) system without the oiliness or flammability. Pleasant lemon fragrance cuts through grease and oil while leaving a protective shine, and is ideally suited for use in food preparation areas, where the odor of mineral spirits and aromatic solvents would be objectionable. 360° valve.

SWEET SMELL OF SUCCESS

In the early 1950s, many companies began to add to their formulas chemicals intended to actually destroy or neutralize offensive odors, as opposed to simply masking them with fragrance. Compounds used for this purpose included various unsaturated esters, long-chain aldehydes and a few pre-polymers.

C - D Boraxo® Powdered Hand Soap For more than 100 years, Boraxo® Heavy-Duty Hand Cleaners have been the hands-on favorite in removing tough grease and grime from hardworking hands. The Boraxo® brand was the first to combine the natural cleaning power of borax and soap. The original powdered hand soap, and still the industry leader, dual action Boraxo® hand soap combines the borax with scrubbing power of soap to easily dissolve grease and dirt when washing with water. All Boraxo® powdered hand soaps are 100% soluble and safe in septic systems.

BUYING GUIDE

The right wiper for the right task!

Wipers are used in every cleaning application from personal care to equipment maintenance. Not all wipers are created equal. Different wipers are designed to be especially effective for certain tasks. Each is engineered with nonwoven substrates, weights, binders and colors in order to balance the different attributes required for optimal cleaning and productivity—strength, absorbency, solvent resistance, lint, wipe dry and hand feel. Just like a tool, matching the right wiper with the right task will make the job easier and more cost-effective. Boardwalk wipers—the right tool for any task.

KIMTECH®

A Wipers for the WETTASK® Refillable Wet Wiping System An ideal alternative to using a spray bottle or open bucket with rag. Wipers are specifically designed to be compatible with quat disinfectants and sanitizers. They maintain the target disinfectant concentration and provide a more uniform application than is possible with a cotton rag. Simply add a roll of wipers and your own chemical solution to the WETTASK® disposable bucket with secure lid. Wipers dispense one at a time, preventing cross-contamination of the cleaning solution while reducing exposure to chemical vapors and splashes. Buckets can be prepared ahead of time and are easily transported, allowing you to spot clean germ zones several times a day.

A – C Total Care 3-Mat System™ Keeping your building's indoor surfaces clean is as easy as 1-2-3. These mats are designed to work together at entryways with heavy foot-traffic, including those at office buildings, stores, schools, restaurants and hotels. Start outside with the Fore-Runner™ Scraper Mat. Then use the Cross-Over™ Wiper/Scraper Mat in the breezeway. The moisture-absorbent Walk-A-Way™ Wiper Mat completes the job in the foyer.

A Fore-Runner™ Indoor/Outdoor Scraper Mat The tough, durable loop-twist construction of these outdoor floor mats scrapes off dirt and grit before it enters the building. Ideal for locations with a large number of daily visitors, including office buildings, universities, convention centers and resorts. Manufacturer's limited one-year warranty.

A WaterGuard Indoor/Outdoor Scraper Mat These mats are recommended as an indoor mat, but substitutes as an outdoor mat in warm to moderate climates. The bi-level construction allows dirt and debris to get trapped below the walking surface and off your floors. The polypropylene carpeted surface makes this a scraper to remove debris and also a wiper to help trap moisture. The non-slip all-rubber cleated backing provides a secure gripping action to carpets and hard surface floors. The beveled edge border helps contain the dirt and moisture and helps reduce the chance of slips, trips and falls. Easy-to-clean and maintain—just shake out, vacuum, hose and dry or clean with a light carpet cleaning machine.

GLOVE PROTECTION GUIDELINES

Facts and Tips about Gloves:

- Gloves protect your hands from the following workplace hand injuries: sharp objects, abrasive surfaces, moving components, wet environments, chemicals, blood-borne pathogens and viruses.
- You must follow a safe procedure for removing gloves so soil, chemicals or viruses do not come into contact with your hands. Remove one glove from top to bottom with the other gloved hand. Then, tuck the first glove into the other gloved hand and peel off the second glove from the inside.
- The glove cuff style is an important consideration based on the protection needed. Some cuffs will allow the glove to be removed quickly or allow ventilation.
- There are several standards and ratings for cut-resistant and coated gloves (i.e. EN, ANSI, ASTM, etc.). Compare similar standards when choosing gloves because ratings can be determined based on different testing methods.
- If you have an allergy to latex or rubber, look for gloves that contain no latex such as vinyl or nitrile.

Size and Fit Matter:

Size and fit are very important to properly protect your hands. Poorly fitted gloves will not be worn and increase the chance for hand injuries.

Too small: make hands fatigue while providing less dexterity and decrease productivity

Too big: more likely to get caught in moving components and not have proper dexterity

Measure your dominant hand with a tape measure around the palm and knuckles.

Here are some general guidelines for men's sizes.

7.5 – 8" – Small 10.5 – 11" – X-Large
8.5 – 9" – Medium 11.5 – 12" – XX-Large

General guidelines for women's sizes.

6" – X-Small 7.5" – Large
6.5" – Small 8" – X-Large
7" – Medium

Questions to Consider When Buying Gloves:

- In which task or application will you be wearing gloves for protection?
- What types of gloves do you use? Why?
- What types of hand injuries happen in your work area?
- What do you like or dislike about your gloves?
- If you can change one thing about your gloves, what would it be?
- What are the costs of the gloves you have purchased recently?

Gloves by Application:

- **There is no one glove that will fit each job or situation. Assess the job and protection needed to purchase the right glove.** Below is a chart that shows the types of gloves commonly found in various applications.

GLOVE TYPES AND ATTRIBUTES

Unsupported: (Chemical Protection)

(Disposable and Multi-Use)

Reliable and economical protection.

Materials: Butyl, Latex, Neoprene, Nitrile, Vinyl.

Uses: Small part handling, food handling, medical and lab use, manufacturing.

Attributes: All latex, vinyl and polyethylene disposable glove component materials comply with relevant federal regulations for food contact. Many are Medical Grade, Class 1 Medical Device approved. Nitrile and vinyl are great alternatives for those with latex allergies. Ideal for tasks when greater dexterity is needed.

Supported: (Chemical Protection)

(Cut/Sewn, Dipped and Cut Protection)

Materials: Butyl, Neoprene, Nitrile, PVC.

Uses: General cleaning, chemical processing.

Attributes: Delivers a varying degree of cut protection and enhanced grip.

Leather: (Leather Palms, Drivers and Welders)

Provides durability, dexterity and comfort.

Uses: General and medium-duty tasks.

Attributes: Leather palms (shown left) are a popular type of leather glove.

Lined leather gloves provide added warmth in cold environments.

Cotton: (Canvas, Jersey and Terrycloth)

Cotton material is cut and sewn together in glove pattern.

Uses: These can keep hands clean and protect against abrasions, but may not be strong enough to handle work with rough or sharp materials.

Attributes: Good abrasion, some with enhanced thermal protection.

Strings: (String Knit, Dipped and Cut Protection)

Fibers are knitted together in glove pattern.

Uses: Light-duty tasks.

Attributes: Allows hands to breathe and reduces perspiration. Provides protection and dexterity. Can be used as a liner for extra protection. Coated/Dotted knits also provide extra grip.

Coated or Dipped Seamless Knit:

(Ninja, Flex, Tuff, UltraTech and Memphis)

Glove is dipped in a polymer coating for added protection.

Uses: Some chemical handling, cleaning, oil refining, food processing.

Attributes: Coatings protect against solvents and chemicals, abrasions, punctures and cuts.

Cut Protection: (Supported, Strings and Synthetic)

Protects hands from sharp edges such as blades, glass, metal, ceramics, etc.

Uses: Medium to heavy-duty tasks.

Attributes: Materials can vary, such as Kevlar®, Dyneema® or composite yarns (HPPE). Not effective in protecting against punctures or power equipment.

Multi-Task: (Leather, Synthetic and Cotton)

Extra material offers more protection.

Uses: Tasks that require superior or specific area protection but with dexterity, grip and working with small parts.

Attributes: Offers specific protection areas and materials depending on the particular task.

European Directives for Personal Protective Equipment

European Standard EN388 established the criteria necessary for rating all PPE items. Many of our hand protection offerings meet these standards – reflected with the CE logo – and have a 4-digit performance rating that measures abrasion, cut, tear and puncture resistance (ACTP).

A glove's overall performance score is indicated by four numbers that represent the four test criteria. The higher the number, the better the performance. Manufacturers may use an X to indicate not tested.

	Criteria	Rating
A	Abrasion Resistance	0-4
C	Blade Cut Resistance	0-5
T	Tear Resistance	0-4
P	Puncture Resistance	0-4

PROTECT YOUR EYES!

Personal protective eyewear, such as goggles, safety glasses and faceshields, must be used in a workplace where an eye hazard exists.

Each day approximately 2,000 U.S. workers sustain an eye injury on the job that requires medical treatment. A third of the injuries are treated in ERs and more than 100 result in a day or more of lost work. The majority of injuries occur because of small particles or objects striking or abrading the eye.

Having the right protective eyewear is critical in preventing eye-related injuries.

Before choosing eye protection, identify the hazards of your workplace. Then, the choice can be made between safety glasses, goggles or a combination with a faceshield as secondary protection.

Eye protection should be fit to the worker or adjustable to provide for appropriate coverage. The worker's personal vision should be considered, with safety glasses large enough to allow the user to wear their own glasses underneath.

www.cdc.gov/niosh/topics/eye

Eyewear Types

Safety Glasses protect against general impact; however, speed of impact must be considered. The higher the velocity, the more likely the safety glasses could be dislodged. In this case, goggles or a faceshield may be a better choice. **See pages 329-333.**

Goggles are available in direct and indirect vented styles. **See pages 333-334.**

Direct vented goggles allow airflow, but are only approved for protection against particulates. Use for jobs such as grinding or cutting where dust is an issue.

Indirect vented goggles are for protection against vapors, chemicals, liquids and dust.

Full Faceshields are the best option for workers exposed to flying particles or chemical splashes. Use in conjunction with safety glasses or goggles to protect against secondary hazards. **See page 335.**

Eyewear Features

UV Protection—for workers exposed to ultraviolet radiation, such as outdoor workers and welders.

Hard-Coated—for applications where lens scratching is an issue.

Anti-Fog/Anti-Mist—for workers who are exposed to extreme temperatures or warm humid environments.

Clear Lenses—for indoor or outdoor applications in below-normal light conditions.

Gray or Brown Lenses—for outdoor use where above-average light is available.

Amber Lenses—for applications where light is below normal or enhanced contrast is needed.

NRR footnote

*Research suggests that many users will receive less noise reduction than indicated by the NRR due to variation in earplug fit and wearing time. It is recommended that the NRR be reduced by 50% for estimating the average amount of noise reduction provided.

Choking Hazard – Keep away from infants and small children. These hearing protectors help reduce exposure to hazardous noise and other loud sounds. **Misuse or failure to wear hearing protectors at all times that you are exposed to noise may result in hearing loss or injury.** For proper use, see supervisor, *User Instructions*, or call 3M PSD Technical Service in the USA at 800-243-4630. In Canada, call Technical Service at 800-267-4414. If there is any drainage from your ear or you have an ear infection, consult with your physician before wearing earplugs. Failure to do so may result in hearing loss or injury. **Noise Reduction Rating (NRR):** 3M strongly recommends fit testing of hearing protectors. If NRR is used to estimate typical workplace protection, 3M recommends that NRR be reduced by 50% or in accordance with applicable regulations. See *User Instructions* for more information.

3M ⚠ WARNING!

Choking Hazard – Keep away from infants and small children. These hearing protectors help reduce exposure to hazardous noise and other loud sounds. **Misuse or failure to wear hearing protectors at all times that you are exposed to noise may result in hearing loss or injury.** For proper use, see supervisor, *User Instructions*, or call 3M PSD Technical Service in the USA at 800-243-4630. In Canada, call Technical Service at 800-267-4414. If there is any drainage from your ear or you have an ear infection, consult with your physician before wearing earplugs. Failure to do so may result in hearing loss or injury. **Noise Reduction Rating (NRR):** 3M strongly recommends fit testing of hearing protectors. If NRR is used to estimate typical workplace protection, 3M recommends that NRR be reduced by 50% or in accordance with applicable regulations. See *User Instructions* for more information.

A – E Particulate Respirators When the job requires work around tiny particles, you and your co-workers will be protected with these lightweight respirators. Make Fire Safety a Priority!

Each year more than 5,000 people are injured in fires and explosions on the job.* Keep extinguishers within reach to safeguard your workplace. OSHA standards require employers to provide proper exits, firefighting equipment, emergency plans, and employee training. A fire safety program is critical for employee safety and facility compliance — make sure yours includes fire extinguishers and smoke alarms.

For OSHA requirements for placement and maintenance of portable fire extinguishers, visit https://www.osha.gov/SLTC/etools/evacuation/portable_required.html

B Uni-Tag® Key Cabinet Help avoid wasted time and frustration by organizing your key sets. In these heavy-gauge, welded steel cabinets with piano-hinged doors, all keys are attached to numbered tags and filed securely on key rack slots. For convenience, whenever key is on loan, the "Out Key" control tag records key number, key recipient and date and is then filed under same slot for accountability. Alphabetical and numerical lock location data charts assist in organization. Piano hinge door provides additional strength and easy open/close. Includes disc tumbler lock and two keys. Manufacturer's limited one year warranty.

C – E Maintenance Sorbent Lightweight, versatile, and takes just minutes to put in place. Dust-free and contains no abrasive granules that can damage expensive equipment. Can be incinerated or fuel blended, leaving less than 0.2% ash. Wring out and reuse numerous times with virtually no loss of sorbent capacity. Allows you to get at the source of a leak before it becomes a bigger problem.

C High-Capacity Maintenance Sorbent Pad Highly absorbent and nongranular so it's perfect for placing directly on machinery. Will not damage plant equipment. Low profile so it fits in tight places. Tuck it in or around machines to catch and contain leaks at the source.

ID No.	Absorbing Volume (Unit)	W × L	Qty.	Unit	Price
4	MMM-M-PD1520DD *	0.375 gal per pad	15½' × 20½'	100	CT

* ASTM F 726. 3M products must be used in accordance with OSHA regulations, warnings and limitations for each product.

D High-Capacity Maintenance Folded Sorbent Four sorbents in one. It can be used as a boom, pillow, pad, or roll, which means you stock one product to meet your sorbent needs. Perforations every 16 inches allow you to select the length required, so there's less wasted sorbent. Comes in a handy dispenser box for easy, on-site use. 3M's high capacity sorbent technology: has increased fluid-holding capacity which means less sorbent used; allows for simple reclamation for recycling of valuable liquids and re-use of sorbent; and minimizes sorbent waste for disposal.

COMPLIANCE MATERIALS

3M WARNING!

FAILURE TO PROPERLY HANDLE AND DISPOSE OF SORBENTS CONTAMINATED BY HAZARDOUS MATERIALS MAY RESULT IN SERIOUS PHYSICAL INJURY OR DEATH AND/OR ENVIRONMENTAL HARM. For proper handling, consult the *Safety Data Sheet* for the material adsorbed, and applicable safety and health standards, contact your supervisor, or call 3M at 1-800-243-4630. To reduce the risk of serious injury or death, adequate precautions should be taken when handling or storing sorbents contaminated by hazardous materials, and appropriate personal protective equipment should be worn. Transportation and disposal of container and its contents must comply with applicable laws and regulations.

3M™ Maintenance Sorbents and 3M™ Petroleum Sorbents must not be used with aggressive liquids, including caustics, acids, oxidizers, and reactive chemicals. 3M™ Chemical Sorbents can adsorb most acids, bases, and other hazardous fluids. For further information regarding chemical compatibility, contact 3M.

B Platinum Air Purifier The Ionic Pro Platinum starts by creating negative ions and releasing them in the air. Negative ions have long been shown to have a positive effect of mood and overall health. Those feel-good ions also adhere themselves to the pollutions, germs, allergens, and then are attracted to the permanent filter plates in the unit and are trapped. This makes cleaning the filter as easy as a rinse in the sink or dishwasher. Manufacturer's limited warranty.

C High-Performance Masking Tape 232 Provides superior performance as a painter's masking tape. Also may be used for holding, protecting, bundling and other difficult jobs where a pressure-sensitive tape is needed. Natural rubber adhesive bonds well to paper, metal, drywall, wood and painted surfaces, conforming around corners and over irregular surfaces. Sticks instantly and holds strongly, resisting lifting, curling. Will not transfer adhesive when removed from surfaces.

STORAGE & MATERIAL HANDLING

FIND THE TRUCK YOU NEED!

Truck Type**Features and Benefits****Cube Trucks**

Use these durable and versatile trucks for a variety of bulky, load-carrying tasks including waste collection, material transport and laundry handling. Available in four capacities. Find these on page 474.

**Tilt Trucks**

These trucks maximize maneuverability and make it easy to dump contents. Ideal for handling bulky materials and loads that are medium to heavyweight. Insert wheels and the overall profile helps protect surroundings. Consider your need for the lid option. Find these on page 475.

**Platform Trucks**

Accommodate loads of varying shapes and sizes aboard a high-capacity platform truck. Depending on what you're moving, you'll want to look at support—more when you're loading multiple, hard-to-balance items—less when loads are more well-balanced. Some platform trucks offer work-height surfaces. Find these on pages 466 – 467.

**Hand Trucks**

Carry a surprisingly heavy load with ease and agility with a two-wheeled hand truck. Buy a model that's dedicated to this role, or combine functionality with a convertible truck that switches from a two-wheeled configuration to a four-wheeled platform. Find these on pages 465 – 466.

**Convertible Trucks**

Change configurations to use one truck for multiple applications. Some versions combine removable shelving with a more open platform truck option. Others provide support alternatives that adjust to the loads you're transporting. Find these on page 468.

D Tilt Truck Offers industrial strength construction to transport heavy loads with ease. These tilt trucks feature seamless one-piece molded truck bodies with a reinforced lip. The sturdy, plastic construction won't rust, dent, chip, or peel. 4-inch center swivel back caster provides easy maneuvering. 10-inch blow-molded polypropylene inset wheels protect surroundings. The dump trailer is constructed of a powder-coated steel frame for corrosion resistance. Easy to handle and maneuver through commercial doorways and onto elevators. The constant force design allows for controlled dumping by one person. Inset wheels protect walls, fixtures and patrons. The smooth surface is easy-to-clean and resists pitting and corroding. Optional domed lids are available (sold separately). Manufacturer's limited one-year warranty.

HIGH-DENSITY

DRAWSTRING

LINERS FOR EVERY NEED!

Choose From Two Types of Plastics

Linear Low Density (LLD) — Tougher transport conditions require the superior tear resistance of LLD liners. This plastic is designed to perform in environments with higher risk of tears or punctures, either from the can liner contents, surrounding environment or through transportation to disposal units, as LLD does not tear easily, even after puncture. **Find these on pages 514-517.**

High Density (HD) — When greater puncture resistance and load capacity are the priority, select HD liners. Even with thinner construction, HD liner material delivers puncture and load benefits—performing well with waste that is heavy, such as unbroken glass, or other materials that do not have sharp edges. **Find these on pages 521-523.**

Strength Grade and Gauge

Strength grades are based on static load, also known as lifting strength. LLD and HD plastic materials achieve the same static load with different gauges; order your bags accordingly. Use this chart for easy reference to determine approximate gauge equivalents.

Strength Grade	LLD Mil Gauge	HD Micron Gauge
Light	.35 – .44	5 – 9
Medium	.45 – .57	10 – 12
Heavy	.58 – .69	13 – 14
Extra-Heavy	.70 – .89	15 – 17
XX-Heavy	.90 – 1.14	—
Super	1.15 – 1.39	—
Super-Heavy	1.40 – up	18 – 24

Light—Use for crumpled paper, cups and light waste.

Medium—Appropriate for packaging waste, wet paper and similar mixed trash.

Heavy—Choose for light wood, metal scraps and wet cardboard.

Extra-Heavy—Select for use when trash is consistently heavy, wet or sharp.

Super/Extra-Heavy—Use on the heaviest cleanup jobs, in warehouses, cafeterias, or facility grounds.

Capacity

Know the capacity of your receptacles and select the bag or liner to suit. Bags and liners are available in a multitude of sizes; gallon capacity is listed with each item throughout this section.

Bottom Seals

Star-Seals — The most common type. Conform easily to any shape waste container, distribute weight evenly inside the bag and have the maximum carrying capacity.

Flat-Seals — Hold more volume than like-sized star seals. Appropriate for somewhat lighter weight loads.

Gusset-Seals — Another seal found in flat-style bags. Offer a good fit in certain receptacles and appropriate for somewhat lighter loads.

Use the sizing guide below to locate your waste receptacle. The right liner size is listed next to it.

The right size is important!

Ideally, you should have about three to four inches of liner overhang on your receptacle. Anything more or less is wasteful of both time and money.

GET THE RIGHT FIT

Using the correct can liner size is key to being cost-effective. Take a look at how bags fit each bin or can at your facility. If they hang over the edge of the receptacle by more than four inches, you are using too much bag for the job!

B Eco Food Trays Eco food trays are made from all kraft paperboard, which contains at least 18% recycled wood fiber content. Like all of our other food trays, the new Eco trays are highly recyclable and compostable when disposed in proper commercial facilities. The trays have disposal logos printed on the bottom to effectively communicate this with your customer. In addition, Eco Trays are made using a totally chlorine free manufacturing process, which consumes less raw material and water, leaving more of those resources untouched. Clearly, Eco Trays are the natural choice for your foodservice needs and our environment.
